

Order SILURIFORMES

Rock Catfishes

Family **AUSTROGLANIDIDAE**

Mo 1991

Austroglanis barnardi, holotype, male, 68.5 mm SL. Illustration by Paul H. Skelton. From: Skelton, P. H. 1981. The description and osteology of a new species of *Gephyroglanis* (Siluriformes, Bagridae) from the Olifants River, South West Cape, South Africa. *Annals of the Cape Provincial Museums (Natural History)* 13 (15): 217–250.

Austroglanis

Skelton, Risch & de Vos 1984

austro-, from *auster* (L.), the south wind, being the most southerly distributed catfishes in Africa; *glánis* (Gr. γλάνις), ancient name for a silurid catfish (probably *Silurus aristotelis*), now used as a general term for catfish

***Austroglanis barnardi* (Skelton 1981)** in honor of South African zoologist Keppel Harcourt Barnard (1887–1964), who described *A. gilli* in 1943, and continuing a tradition of naming species in this genus after directors of the South African Museum

***Austroglanis gilli* (Barnard 1943)** in honor of Edwin Leonard Gill (1877–1956), Director, South African Museum (noting that it is “appropriate” that *A. sclateri* was named after Gill’s predecessor)

***Austroglanis sclateri* (Boulenger 1901)** in honor of William Lutley Sclater (1863–1944), Director, South African Museum, who supplied holotype
