

Order CHARACIFORMES

Muckfish

Family **TARUMANIIDAE**

de Pinna, Zuanon, Rapp Py-Daniel & Petry 2017

*Tarumania walkerae*, holotype, 81.6 mm SL. From: de Pinna, M. C. C., J. Zuanon, L. H. Rapp Py-Daniel and P. Petry. 2017. A new family of neotropical freshwater fishes from deep fossorial Amazonian habitat, with a reappraisal of morphological characiform phylogeny (Teleostei: Ostariophysi). *Zoological Journal of the Linnean Society* 182 (1): 76–106. [First published online, pp. 1–31, 11 Aug. 2017; volume number and pages added in January 2018.]

***Tarumania***

de Pinna, Zuanon, Rapp Py-Daniel & Petry 2017

-ia (L. suffix), belonging to: the river Tarumã-Mirim, tributary of the lower Rio Negro, Manaus, Brazil, type locality

***Tarumania walkerae* de Pinna, Zuanon, Rapp Py-Daniel & Petry 2017**

in honor of “eminent” limnologist Ilse Walker, Instituto Nacional de Pesquisas da Amazônia (Manaus), for her lifelong contribution to the knowledge of Amazonian ecology and for collecting the first (and for some years, only) known specimen in 1999
