Revised 5 Sept. 2023 Tomments

Order CARCHARHINIFORMES

Hound Sharks

Family TRIAKIDAE

Gray 1851

Hound Sharks Subfamily TRIAKINAE Gray 1851

Mustelus Linck 1790

from *mustela* (L.), weasel, an ancient name for sharks, possibly referring to pointed snouts, swift movements and/or rapacious feeding behavior

of smaller predatory sharks¹ [strictly not tautonymous with *Squalus mustelus* Linnaeus 1758 since type was designated by the ICZN]

Mustelus albipinnis Castro-Aguirre, Antuna-Mendiola, González-Acosta & De la Cruz-Agüero 2005 albus (L.), white; pinnis, Neo-Latin adjective of pinna (L.), fin, i.e., finned, referring to white margin around dorsal, pectoral, pelvic and anal fins

Mustelus andamanensis White, Arunrugstichai & Naylor 2021 -ensis, Latin suffix denoting place: Andaman Sea, Thailand, only known area of occurrence

Mustelus antarcticus Günther 1870 Latin for southern, referring to its distribution in the southern Pacific around Australia

Mustelus asterias Cloquet 1819 asterías (Gr. ἀστερίας), a starred or starry fish or bird, referring to many small white spots on dorsal (upper) surface of body

Mustelus californicus Gill 1864 -icus (L.), belonging to: California, referring to its common occurrence along the coast of California (USA)

Mustelus canis (Mitchill 1815) Latin for dog; sharks were derogatorily called "dogs" or "sea dogs" in ancient times due to the threat they posed to humans and their unpalatability except as food for the poor

Mustelus canis insularis Heemstra 1997 Latin for of islands, referring to its occurrence at several Caribbean islands (Cuba, Jamaica, Grand Cayman, Puerto Rico, Nevis Island, Sint Eustatius, the Bahamas and Bermuda), where it appears to be the only species of *Mustelus*

Mustelus dorsalis Gill 1864 Latin for "of the back," referring to "projection of the posterior angle of the first dorsal fin to the vertical of the origin of the ventrals"

¹ Strömberg, R. 1943. Studien zur Etymologie und Bildung der griechischen Fischnamen. Göteborg: Wettergren & Kerber. 1–165.

Mustelus fasciatus (Garman 1913) Latin for banded, referring to vertical dark bars on body (at least in young)

Mustelus griseus Pietschmann 1908 Medieval Latin for gray, referring to gray or gray-brown color

Mustelus henlei (Gill 1863) in honor of Friedrich Gustav Jacob Henle (1807–1885), German physician, pathologist and anatomist, who, along with Johann Müller, produced the first authoritative work on sharks (1839–1841)

Mustelus higmani Springer & Lowe 1963 in honor of American fisheries biologist James B. Higman (1922–2009), U.S. Fish and Wildlife Service, for his "initial interest in the species and his care in the preparation of excellent notes on its natural history" while serving as an observer on the vessel from which it was collected

Mustelus lenticulatus Phillipps 1932 Latin for freckled, referring to peppering of white spots on upper sides

Mustelus Iunulatus Jordan & Gilbert 1882 Latin for somewhat moonshaped, referring to the concave margins of its fins

Mustelus manazo Bleeker 1854 Japanese vernacular for this shark

Mustelus mento Cope 1877 from mentum (L.), chin, referring to its "long muzzle"

Mustelus minicanis Heemstra 1997 mini-, from minimus (L.), least; canis (L.), dog, being a dwarf version of M. canis

Mustelus mosis Hemprich & Ehrenberg 1899 etymology not explained (no written description); since *mosis* is the Latin spelling of Moses, possibly an allusion to this shark's type locality in the Red Sea

Mustelus mustelus (Linnaeus 1758) from mustela (L.), weasel, an ancient name for sharks, possibly referring to pointed snouts, swift movements and/or rapacious feeding behavior of smaller predatory sharks¹

Mustelus norrisi Springer 1939 in honor of American zoologist Harry Waldo Norris (1862–1946), Grinnell College (Iowa), who studied the cranial nerves of the Spiny Dogfish *Squalus acanthias*

Mustelus palumbes Smith 1957 Latin for wood-pigeon or ring-dove, referring to its dove-gray coloration

2 · The ETYFish Project

Mustelus punctulatus Risso 1827 diminutive of punctum (L.), spot, i.e., having tiny spots, referring to small black spots often present on body

Mustelus ravidus White & Last 2006 Latin for grayish, referring to its pale-gray dorsal coloration

Mustelus schmitti Springer 1939 in honor of American biologist Waldo L. Schmitt (1887–1977), curator of marine invertebrates at the U.S. National Museum, who collected holotype

Mustelus sinusmexicanus Heemstra 1997 -anus (L.), belonging to: sinus (L.), bay or gulf, referring to the Gulf of Mexico, type locality

Mustelus stevensi White & Last 2008 in honor of John Stevens (b. 1947), Senior Principal Research Scientist, CSIRO Marine and Atmospheric Research (Australia), who has "dedicated a lifetime to researching sharks around the world, and who has contributed greatly to our knowledge of sharks and rays in Australia"

Mustelus whitneyi Chirichigno F. 1973 in honor of American fisheries biologist Richard R. Whitney (1927–2011), for his teachings and guidance during the author's study of sharks

Mustelus widodoi White & Last 2006 in honor of the late Johannes Widodo (1944–2005), Research Institute of Marine Fisheries (Jakarta, Indonesia), "whose research on the shark and ray fisheries of Indonesia has provided important baseline data for this important faunal region"

Scylliogaleus

Boulenger 1902

etymology not explained, presumably a combination of *Scyllium* and *galeus*, i.e., a "galeid" shark with "nostrils as in *Scyllium*" (=*Scyliorhinus*, Scyliorhinidae)

Scylliogaleus quecketti Boulenger 1902 in honor of London-born conchologist John Frederick Whitlie Quekett (1849–1913), Curator, Durban Museum (South Africa), who provided holotype [Boulenger consistently misspelled Quekett's name as "Queckett"]

Scylliogaleus quecketti. From: Boulenger, G. A. 1902. Description of a new South-African galeid selachian. Annals and Magazine of Natural History (Series 7) 10 (55): 51–52, Pl. 4.

Triakis

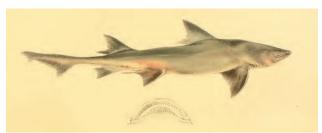

Müller & Henle 1838

tri-, from tres (L.), three; akis (Gr. ἀκίς), point, referring to each tooth consisting of one large central cusp flanked on by both sides by a small cusplet

Triakis acutipinna Kato 1968 *acutus* (L.), sharp or pointed; *pinna* (L.), fin, referring to its sharp-tipped fins

Triakis maculata Kner & Steindachner 1867 Latin for spotted, referring to many small black spots on body (some specimens are unspotted)

Triakis megalopterus (Smith 1839) large-finned, from *mégas* (Gr. μέγας), big, and *pterus*, from *pterón* (Gr. πτερόν) *or ptéryx* (πτέρυξ), fin, referring to its broad, large fins

Triakis megalopterus. From: Smith, A. 1838–47. Pisces. In: Illustrations of the zoology of South Africa; consisting chiefly of figures and descriptions of the objects of natural history collected during an expedition into the interior of South Africa in 1834–36. v. 4: 77 unnumb. pp, accompanying Pls. 1–31. [This plate published in 1839.]

Triakis scyllium Müller & Henle 1839 Latinization of *skýlion* (Gr. σκύλιον), small dog or whelp, i.e., a small shark (sharks were derogatorily called "dogs" or "sea dogs" in ancient times)

Triakis semifasciata Girard 1855 *semi-*, from *semis* (L.), half; *fasciata* (L.), banded, referring to striking black saddle marks that cover only dorsal half of body

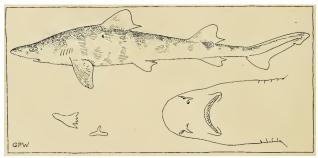

School Sharks Subfamily GALEORHININAE Gill 1862

Furgaleus

Whitley 1951

fur, Latin for thief (Whitley said "'shark" or villain"); galeus, from galeos, a small shark or dogfish per Aristotle (sometimes translated as weasel, possibly referring to pointed snouts, swift movements and/or rapacious feeding behavior of smaller predatory sharks¹) [replacement name for Fur Whitley 1943, preoccupied by Fur Jones 1940 in Diptera]

Furgaleus macki (Whitley 1943) in honor of British-born ichthyologistornithologist George Mack (1899–1963), National Museum, Melbourne, Australia

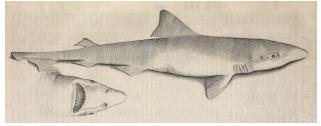

Furgaleus macki. Illustration by Gilbert Percy Whitley. From: Whitley, G. P. 1943. Ichthyological notes and illustrations. (Part 2). Australian Zoologist 10 (2): 167–187.

Galeorhinus

Blainville 1816

galeo, probably based on G. galeus (see below); rhinus, an ancient name for sharks, from rhinós (Gr. ῥινός), skin or hide of a beast, or from rhín \bar{e} (Gr. ῥίνη), rasp, both apparently alluding to a shark's rough skin

Galeorhinus galeus (Linnaeus 1758) from galeos, a small shark or dogfish per Aristotle (sometimes translated as weasel), possibly referring to pointed snouts, swift movements and/or rapacious feeding behavior of smaller predatory sharks¹)

Canis (now Galeorhinus) galeus, as illustrated in one of the publications from which Linnaeus based his description: Salviani, I. 1558. Aquatilium animalium Historiae liber primus. Romae.

Gogolia

Compagno 1973

-ia (L. suffix), belonging to: Gogol River, Madang Province, Papua New Guinea, type locality

Gogolia filewoodi Compagno 1973 in honor of Australian biologist Lionel Winston Filewood (1936–2014), Biologist-In-Charge, Department of Agriculture, Stock and Fisheries, Konedobu, Papua New Guinea, for his work on the poorly known elasmobranch fauna of New Guinea; he intended to describe this shark with Compagno but was unable to do so, whereupon he "generously relinquished" both the task and the holotype to his collaborator

Gogolia filewoodi, holotype, adult female, 739 mm TL. From: Compagno, L. J. V. 1973. Gogolia filewoodi, a new genus and species of shark from New Guinea (Carcharhiniformes: Triakidae), with a redefinition of the family Triakidae and a key to triakid genera. Proceedings of the California Academy of Sciences (Series 4) 39 (19): 383–410.

Hemitriakis

Herre 1923

hemi-, from hḗmisys (Gr. ἤμισυς), half, being a genus that Herre believed was "most closely related" to *Triakis*

Hemitriakis abdita Compagno & Stevens 1993 Latin for hidden, referring to the close external similarity of this sibling species to H. falcata

Hemitriakis complicofasciata Takahashi & Nakaya 2004 complico (L.), complicated; fasciata (L.), striped, referring to complex body color pattern of young specimens

Hemitriakis falcata Compagno & Stevens 1993 Latin for sickle-shaped, referring to strongly curved fins of adults

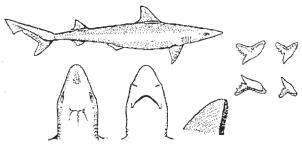

Hemitriakis indroyonoi White, Compagno & Dharmadi 2009 in honor of Indroyono Soesilo (b. 1955), geologist, engineer and Chairman, Marine and Fisheries Research Agency (Jakarta, Indonesia), "who has provided a great deal of support for shark research in Indonesia and was a strong advocate for the production of the field guide to sharks and rays of Indonesia"

Hemitriakis indroyonoi, holotype, immature male, 696 mm TL. From: White, W. T., L. J. V. Compagno and D. Dharmadi. 2009. Hemitriakis indroyonoi sp. nov., a new species of houndshark from Indonesia (Carcharhiniformes: Triakidae). Zootaxa 2110: 41–57.

Hemitriakis japanica (Müller & Henle 1839) -ica (L.), belonging to: Japan, type locality

Hemitriakis leucoperiptera Herre 1923 leuco-, from leukós (Gr. λευκός), white; perí (Gr. περί), around; ptera, from pterón (Gr. πτερόν) or ptéryx (πτέρυξ), fin, referring to white margin around fins

Hypogaleus hyugaensis, lateral view, dorsal view of head, ventral view of head, free margin of first dorsal fin, and teeth. From: Miyosi, Y. 1939. Description of three new species of elasmobranchiate fishes collected at Hyuga Nada, Japan. Bulletin of the Biogeographical Society of Japan 9 (5): 91–97.

Hypogaleus Smith 1957

hypó (Gr. $\dot{\upsilon}\pi\dot{o}$), somewhat or a little, allusion not explained, perhaps alluding to its original position as a subgenus of *Galeus*

Hypogaleus hyugaensis (Miyosi 1939) *-ensis*, Latin suffix denoting place: Hyuga Nada, Japan, type locality

lago

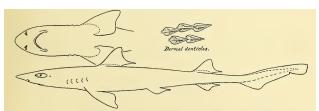

Compagno & Springer 1971

name of villain in Shakespeare's *Othello*, referring to how members of this genus have been a "troublemaker for systematists and hence a kind of villain"

lago garricki Fourmanoir & Rivaton 1979 patronym not identified but clearly in honor of J. A. F. (Jack) Garrick (1928–2018), New Zealand shark biologist

lago mangalorensis (Cubelio, Remya & Kurup 2011) -ensis, Latin suffix denoting place: Mangalore, South India, type locality

lago omanensis (Norman 1939) *-ensis*, Latin suffix denoting place: Gulf of Oman, type locality

lago omanensis. From: Norman, J. R. 1939. Fishes. The John Murray Expedition 1933–34. Scientific Reports, John Murray Expedition 7 (1): 1–116.
